## 2009 LIVE FOALS Reported by Stallion

# Foal Crop Shrinks 8.2%

The Jockey Club reports that 3,439 stallions covered 56,901 mares in North America during 2008. These matings have resulted in 31,727 live foals of 2009 being reported to The Jockey Club on Live Foal Reports received as of Sept. 9, 2009.

As in past years, The Jockey Club estimates the reporting of live foals, at this point, is approximately 90% complete. The reporting of live foals of 2009 is down

8.2% from last year at this time.

“As we announced last month, the North American registered foal crop projection for 2009 has been revised downward to 34,000 and the live foal returns to date reflect that,” said Matt Iuliano, The Jockey Club’s vice president of registration services. “Although breeding activity has been in decline for several years, the rate of decline accelerated in both the 2008 and 2009

breeding seasons so we will see fewer live foals born next year as well.”

The 2009 registered foal crop projection of 34,000 takes into account that not all live foals become registered. In addition to the 31,727 live foals of 2009 reported, The Jockey Club had also received 6,755 No Foal Reports for the 2009 foaling season.

The number of stallions declined 5.5% from the 3,638 reported for 2007 at this time last year, while the number of mares bred decreased 7.1% from the 61,262 reported for 2007.

The 2008 breeding statistics are available alphabetically by stallion name through the Publications and Resources link on The Jockey Club homepage at [jockeyclub.com](http://jockeyclub.com).
